New Jersey Department of Education Health History Update Questionnaire

Name of School:
To participate on a school-sponsored interscholastic or intramural athletic team or squad, each student whose physical examination was completed more than 90 days prior to the first day of official practice shall provide a health history update questionnaire completed and signed by the student's parent or guardian.
Student:Age: Grade:
Date of Last Physical Examination: Sport:
Since the last pre-participation physical examination, has your son/daughter: 1. Been medically advised not to participate in a sport? Yes No If yes, describe in detail:
2. Sustained a concussion, been unconscious or lost memory from a blow to the head? Yes No If yes, explain in detail:
3. Broken a bone or sprained/strained/dislocated any muscle or joints? Yes No If yes, describe in detail.
4. Fainted or "blacked out?" Yes No If yes, was this during or immediately after exercise?
5. Experienced chest pains, shortness of breath or "racing heart?" Yes No
6. Has there been a recent history of fatigue and unusual tiredness? Yes No 7. Been hospitalized or had to go to the emergency room? Yes No If yes, explain in detail
8. Since the last physical examination, has there been a sudden death in the family or has any member of the family under age 50 had a heart attack or "heart trouble?" Yes No
9. Started or stopped taking any over-the-counter or prescribed medications? Yes No
10. Been diagnosed with Coronavirus (COVID-19)? Yes No
If diagnosed with Coronavirus (COVID-19), was your son/daughter symptomatic? Yes No If diagnosed with Coronavirus (COVID-19), was your son/daughter hospitalized? Yes No 11 Has any member of the student athlete's household beautiful and its continuous to the student athlete's household beautiful as any member of the student athlete's household beautiful as a six and the student athlete's household beautiful as a six and the student athlete's household beautiful as a six and the student athlete's household beautiful as a six and the student athlete's household beautiful as a six and the student athlete's household beautiful as a six and the student athlete's household beautiful as a six and the student athlete's household beautiful as a six and the student athlete's household beautiful as a six and the student athlete's household beautiful as a six and the six and the student athlete's household beautiful as a six and the six an
11. Has any member of the student-athlete's household been diagnosed with Coronavirus (COVID-19)? Yes No

NJSIAA STEROID TESTING POLICY

CONSENT TO RANDOM TESTING

In Executive Order 72, issued December 20, 2005, Governor Richard Codey directed the New Jersey Department of Education to work in conjunction with the New Jersey State Interscholastic Athletic Association (NJSIAA) to develop and implement a program of random testing for steroids, of teams and individuals qualifying for championship games.

Beginning in the Fall, 2006 sports season, any student-athlete who possesses, distributes, ingests or otherwise uses any of the banned substances on the attached page, without written prescription by a fully-licensed physician, as recognized by the American Medical Association, to treat a medical condition, violates the NJSIAA's sportsmanship rule, and is subject to NJSIAA penalties, including ineligibility from competition. The NJSIAA will test certain randomly selected individuals and teams that qualify for a state championship tournament or state championship competition for banned substances. The results of all tests shall be considered confidential and shall only be disclosed to the student, his or her parents and his or her school. No student may participate in NJSIAA competition unless the student and the student's parent/guardian consent to random testing.

By signing below, we consent to random testing in accordance with the NJSIAA steroid testing policy. We understand that, if the student or the student's team qualifies for a state championship tournament or state championship competition, the student may be subject to testing for banned substances.

Sports-Related Concussion and Head Injury Fact Sheet and Parent/Guardian Acknowledgement Form

A concussion is a brain injury that can be caused by a blow to the head or body that disrupts normal functioning of the brain. Concussions are a type of Traumatic Brain Injury (TBI), which can range from mild to severe and can disrupt the way the brain normally functions. Concussions can cause significant and sustained neuropsychological impairment affecting problem solving, planning, memory, attention, concentration, and behavior.

The Centers for Disease Control and Prevention estimates that 300,000 concussions are sustained during sports related activities nationwide, and more than 62,000 concussions are sustained each year in high school contact sports. Second-impact syndrome occurs when a person sustains a second concussion while still experiencing symptoms of a previous concussion. It can lead to severe impairment and even death of the victim.

Legislation (P.L. 2010, Chapter 94) signed on December 7, 2010, mandated measures to be taken in order to ensure the safety of K-12 student-athletes involved in interscholastic sports in New Jersey. It is imperative that athletes, coaches, and parent/guardians are educated about the nature and treatment of sports related concussions and other head injuries. The legislation states that:

- All Coaches, Athletic Trainers, School Nurses, and School/Team Physicians shall complete an Interscholastic Head Injury Safety Training Program by the 2011-2012 school year.
- All school districts, charter, and non-public schools that participate in interscholastic sports will distribute
 annually this educational fact to all student athletes and obtain a signed acknowledgement from each
 parent/guardian and student-athlete.
- Each school district, charter, and non-public school shall develop a written policy describing the
 prevention and treatment of sports-related concussion and other head injuries sustained by interscholastic
 student-athletes.
- Any student-athlete who participates in an interscholastic sports program and is suspected of sustaining a
 concussion will be immediately removed from competition or practice. The student-athlete will not be
 allowed to return to competition or practice until he/she has written clearance from a physician trained in
 concussion treatment and has completed his/her district's graduated return-to-play protocol.

Quick Facts

- Most concussions do not involve loss of consciousness
- You can sustain a concussion even if you do not hit your head
- A blow elsewhere on the body can transmit an "impulsive" force to the brain and cause a concussion

Signs of Concussions (Observed by Coach, Athletic Trainer, Parent/Guardian)

- Appears dazed or stunned
- Forgets plays or demonstrates short term memory difficulties (e.g. unsure of game, opponent)
- Exhibits difficulties with balance, coordination, concentration, and attention
- Answers questions slowly or inaccurately
- Demonstrates behavior or personality changes
- Is unable to recall events prior to or after the hit or fall

Symptoms of Concussion (Reported by Student-Athlete)

- Headache
- Nausea/vomiting
- Balance problems or dizziness
- Double vision or changes in vision

- Sensitivity to light/sound
- · Feeling of sluggishness or fogginess
- Difficulty with concentration, short term memory, and/or confusion

What Should a Student-Athlete do if they think they have a concussion?

- Don't hide it. Tell your Athletic Trainer, Coach, School Nurse, or Parent/Guardian.
- Report it. Don't return to competition or practice with symptoms of a concussion or head injury. The sooner you report it, the sooner you may return-to-play.
- Take time to recover. If you have a concussion your brain needs time to heal. While your brain is healing you are much more likely to sustain a second concussion. Repeat concussions can cause permanent brain injury.

What can happen if a student-athlete continues to play with a concussion or returns to play to soon?

- Continuing to play with the signs and symptoms of a concussion leaves the student-athlete vulnerable to second impact syndrome.
- Second impact syndrome is when a student-athlete sustains a second concussion while still having symptoms from a previous concussion or head injury.
- Second impact syndrome can lead to severe impairment and even death in extreme cases.

Should there be any temporary academic accommodations made for Student-Athletes who have suffered a concussion?

- To recover cognitive rest is just as important as physical rest. Reading, texting, testing-even watching movies can slow down a student-athletes recovery.
- Stay home from school with minimal mental and social stimulation until all symptoms have resolved.
- Students may need to take rest breaks, spend fewer hours at school, be given extra time to complete assignments, as well as being offered other instructional strategies and classroom accommodations.

<u>Student-Athletes who have sustained a concussion should complete a graduated return-to-play before they may resume competition or practice, according to the following protocol:</u>

- Step 1: Completion of a full day of normal cognitive activities (school day, studying for tests, watching practice, interacting with peers) without reemergence of any signs or symptoms. If no return of symptoms, next day advance.
- Step 2: Light Aerobic exercise, which includes walking, swimming, and stationary cycling, keeping the intensity below 70% maximum heart rate. No resistance training. The objective of this step is increased heart rate.
- Step 3: Sport-specific exercise including skating, and/or running: no head impact activities. The objective of this step is to add movement.
- Step 4: Non contact training drills (e.g. passing drills). Student-athlete may initiate resistance training.
- Step 5: Following medical clearance (consultation between school health care personnel and studentathlete's physician), participation in normal training activities. The objective of this step is to restore confidence and assess functional skills by coaching and medical staff.
- Step 6: Return to play involving normal exertion or game activity.

SUDDEN CARDIAC DEATH IN ATHLETES PAMPHLET PARENT/GUARDIAN and STUDENT ACKNOWLEDGEMENT FORM

Sudden cardiac death is the result of an unexpected failure of proper heart function, usually (about 60% of the time) during or immediately after exercise without trauma. Since the heart stops pumping adequately, the athlete quickly collapses, loses consciousness, and ultimately dies unless normal heart rhythm is restored using an automated external defibrillator (AED).

Sudden cardiac death in young athletes is very rare. About 100 such deaths are reported in the United States per year. The chance of sudden death occurring to any individual high school athlete is about one in 200,000 per year. Sudden cardiac death is more common: in males than in females; in football and basketball than in other sports; and in African-Americans than in other races and ethnic groups.

By signing this form you acknowledge that you have read and understand the accompanying educational pamphlet outlining sudden cardiac death in athletes the signs and symptoms and recommendations.

This form will remain on file in the Athletic Office as required by NJDOE pursuant to (N.J.S.A. 18A:40-41)

Use and Misuse of Opioid Drugs Fact Sheet Student-Athlete and Parent/Guardian Sign-Off

Name of School: RED BANK REGIONAL HIGH SCHOOL

In accordance with *N.J.S.A.* 18A:40-41.10, public school districts, approved private schools for students with disabilities, and nonpublic schools participating in an interscholastic sports program must distribute this *Opioid Use and Misuse Educational Fact Sheet* to all student-athletes and cheerleaders. In addition, schools and districts must obtain a signed acknowledgement of receipt of the fact sheet from each student-athlete and cheerleader, and for students under age 18, the parent or guardian must also sign.

This sign-off sheet is due to the appropriate school personnel as determined by your district prior to the first official practice session of the spring 2018 athletic season (March 2, 2018, as determined by the New Jersey State Interscholastic Athletic Association) and annually thereafter prior to the student-athlete's or cheerleader's first official practice of the school year.

Name of School District (if applicable): RED BANK REGIONAL SCHOOL DISTRICT

I/We acknowledge that we received and reviewed the Educational Fact Sheet on the Use and Misuse of Opioid Drugs.

Student Signature:		
Parent/Guardian Signature:

Memorandum

To: All Athletic Directors of Member Schools

From: Tony Maselli, Assistant Director

Date: June 2019

Re: Opioid Education Video Procedure

To All Athletic Directors:

Acting to address the increased risk of opioid abuse among high school athletes, the Office of the New Jersey Coordinator for Addiction Responses and Enforcement Strategies (NJCARES) and the New Jersey State Interscholastic Athletic Association (NJSIAA) announced on February 19, 2019, a new partnership to educate student athletes and their parents/guardians on addiction risks associated with sports injuries and opioid use.

This educational initiative, spearheaded by Attorney General Gurbir Grewal and approved by the Executive Committee of the NJSIAA, is a collaborative effort to use video programming to raise awareness among high school athletes that they face a higher risk of becoming addicted to prescription pain medication than their fellow students who do not play sports.

Beginning with the 2019 fall season, we are making available to all student athletes and their parents/guardians, an educational video about the risks of opioid use as it relates to student athletes. The video will be available on August 1, 2019 and can be found on the NJSIAA website under "Athlete Wellness" which is located under the "Health & Safety tab. We are strongly encouraging student athletes and parents/guardians to watch the video as soon as it becomes available. An acknowledgement that students and their parents/guardians have watched the video will be required starting with the 2019-2020 winter season.

All member schools are asked to add to their current athletic consent forms the sign-off listed below. The sign-off acknowledgment is an NJSIAA mandate; student athletes are required to view the video only once per school year prior to the first official practice of the season in their respective sport, but the signed acknowledgment is required for each sport a student participates in. Athletes that are 18 years or older do not need the parents/guardians to watch the video.

NJSIAA OPIOID POLICY ACKNOWLEDGEMENT

Student's Signature

We have viewed the NJ CARES educational video on the risks of opioid use for high school athletes. We understand the NJSIAA policy that requires students, and their parents(s)/guardian(s) if a student is under the age of 18, to view this video and sign this acknowledgement.
